

Email notifications in PRODUCT Settings

In addition, each product can be configured with a list of e-mail addresses. When that product is purchased, e-mail notifications will be sent to all the configured e-mail addresses. The configuration for product-level e-mail notifications is located on the **Product Settings** page for each product. (For more details about the configuration setting for product-level notifications, see **"Editing Products" on page 310** in the User's Guide.)

Use the following steps to edit a product:

1 From the left navigation menu, navigate to Marketplace Home

Click on

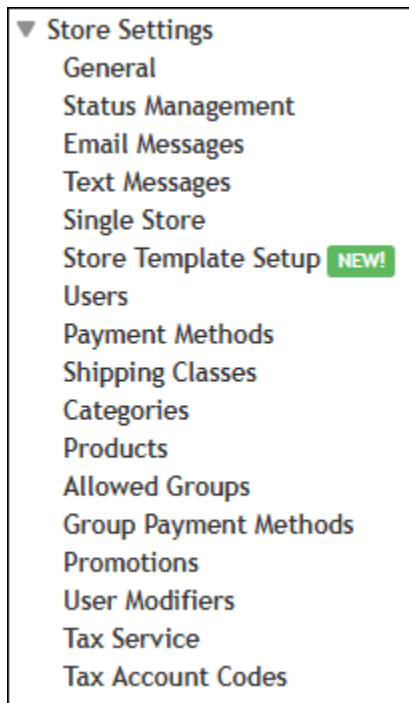

>[Your merchant name]

> Stores

> [your store name]

> Store Settings

It will look like this at this point. Click on > Products.

The Products page appears for the store you selected above.
It will show the list of the products that are currently defined in your store.

You will see something like

The screenshot shows a web interface for a store named 'Jennifer's Test Store August 2018'. At the top, there is a yellow banner with the text 'Click on links to access product settings, items for sale, and modifiers.' Below this banner are three buttons: 'Add Product', 'Import Product', and 'Related Products'. The main section is titled 'Products' and features a 'Show 25 entries' dropdown menu. Below the menu is a table with two columns: 'Name' and 'Type'. The table contains one entry: 'T-shirt August' with a 'Generic' type. At the bottom of the table, it says 'Showing 1 to 1 of 1 entries'.

Name	Type
T-shirt August	Generic

2 Click the product name.

The Product Settings page appears for that product.

There are a lot of items here, but scroll down until you see **Product Notifications**.

It will look something like this:

The screenshot shows the 'Product Notification' section of a product settings page. It includes a heading 'Product Notification' and a sub-heading 'To send product notifications, enter email address. For multiple email addresses, use a comma as a separator.' Below this is a text input field labeled 'Email Addresses: (500 chars max)'. The input field contains the text 'myemail address@auburn.edu'.

Change the email address – or add yours to the list.

THEN PRESS THE SAVE BUTTON!

You will have to scroll down to find it before the Product Image Management for Stores section. (see example that follows)

Continue Shopping Button Settings
